Jazzed-up tofu

When eaten plain, tofu can be rather bland. But when diced, deep-fried and served with sauces such as Thai sweet chilli, nacho cheese, yakitori and goma, it becomes a healthy yet tasty snack.

From March 15 to 18, sample SOyCube Tofu's tempura tofu cubes (\$7 for a cup, with a choice of two sauces) at the Food & Beverage Fair 2018 at Singapore Expo Hall 5, booths J9 and J11.

Chicken goodness

Eu Yan Sang's Traditional Essence of Chicken is a nutritious supplement that has long been a favourite of hardworking students.

Its Traditional Black Boned Chicken Tonic offers all the goodness of your grandmother's painstakingly prepared soup without the hassle of long hours of cooking.

Visit Eu Yan Sang at the Food & Beverage Fair from March 15 to 18, at Singapore Expo Hall 5, booth G01.

Cubed and convenient

The Noodle Factory's Cubie Hotpot Noodles and Cubie Crispy Noodles come in cute little cubes that will make it a cinch to avoid the mess that results from having to break up big blocks of noodles to fit into small pots and pans.

Cubie noodles are certified halal, vegetarian-friendly, and free of preservatives and colouring.

Find The Noodle Factory at the Food & Beverage Fair from March 15 to 18 at Singapore Expo Hall 5, Booth F53.

Art and smarts

Apart from exhibitor booths, SmartKids Asia 2018 will also offer children hands-on fun

At this year's edition of education fair SmartKids Asia, don't miss new highlight The Sensory Art Trail, a multi-sensory experiential route curated by a group of lecturers from LaSalle College of the Arts and three Singaporean artists.

Children can explore textures, tastes, smells and musical instruments at a logic game space on a conceptual tropical forest trail. The activities encourage kids to use scientific processes as they play, create and investigate.

Another new highlight, The Learning Pavilion, involves a diverse group of exhibitors coming together to demonstrate what a shared classroom could look like. It explores how a shared space facilitates cross-learning through educational activities and games.

The pavilion's exhibitors include Augustine's English Centre, Challenge Island,

Elloquence English Learning Centre, Fundamental Learning Centre, Knowledge Point Education Hub, Precious Gems, Premium Tutors, The Musical Voyage, The Learning Board, vGenius, and Yang Guang Chinese Enrichment Centre.

Said to be the region's largest education event, SmartKids Asia was launched in 2012 for the benefit of parents and educators of children aged two to 12.

Qiren Organisation (booth D27), an authorised representative of life insurance agency in AIA Singapore, returns for the second year as the presenting sponsor of the event. Marshall Cavendish Education (booths D09 and D11) is the event's official learning partner.

Sensational Asian eats

The sixth edition of Asian Masters, which comprises a year-long celebration of the best of the region's gastronomy, starts today.

This year, in addition to a stellar selection of exclusive gourmet dinners, there will be new concept events such as Shambala! — A Vegan Dining Experience, where dishes are paired with elixirs and combined with an experience of Osim massage chairs.

Another highlight is A Farm To Table Dinner, where five renowned chefs from different establishments collaborate to create a five-course menu using locally farmed produce.

Asian Masters will also celebrate female chefs in a predominantly male-dominated industry at The Rosé Champagne Dinner.

Four leading female chefs will whip up dishes to be paired with a range of rosé champagne from Ruinart, Veuve Clicquot and Moët & Chandon.

HSBC cardholders will enjoy a 20 per cent discount on all Asian Masters events.

Throughout the year, they will also enjoy 15 per cent off a la carte food bills at more than 50 Feast Asia participating restaurants.

To make reservations for Asian Masters events, call 6319-4038 or visit www.asianmasters.com.sg

Survivor for kids

Best described as a cross between reality television shows Survivor, Are You Smarter Than A 5th Grader? and Junior MasterChef, Challenge Island is an enrichment programme for children aged five to 12.

It teaches them to overcome challenges on imaginary islands using only their creativity and the materials provided.

Using a S.T.E.A.M. (science, technology, engineering, art and maths) curriculum, the programme is designed to help children develop perseverance, adaptability, and critical thinking and problem-solving skills — while having fun.

Visit booth B27 at SmartKids Asia 2018 to join the Challenge Island trial class and enjoy a special discount for every sign-up.

App-titude for maths

Brainy Arkies (www.brainyarkies.com), a mathematics learning app for primary school pupils, integrates automated adaptive testing and personalised learning with edutainment.

Through the app, developer Marshall Cavendish

Education aims to combine research-driven approaches and innovative technology to enrich learning.

Visit booths D09 and D11 at SmartKids Asia to find out more, enjoy exclusive offers and win attractive Brainy Arkies premiums.

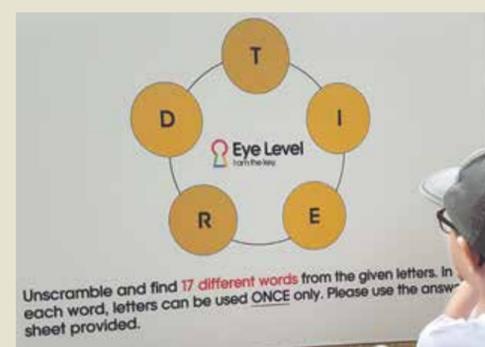

PHOTO: EYE LEVEL

Perform at your level best

Eye Level (www.myeylevel.com) says its enrichment programmes adopt a learning philosophy from each child's perspective, teaching him at the level most appropriate for his knowledge, ability and learning style. This allows children to progress steadily at a comfortable pace.

Visit booth D01 at SmartKids Asia 2018 to find out more.
